

LEADERVIEWS

We want our customers to save money in 2019, not waste it! Read our [Leader Views Blog](#) for 5 reasons why following good manufacturing processes saves money for our clients in industries ranging from Food & Beverage to Medical & Dental.

ABOUT US

Happy New Year to all of our customers, team members and our entire community of support! Big things are ahead in 2019 – from the expansion completion of our Kent facility to new ideas for innovative products that will soon come to life, we can't wait to see what this new year holds for our

company. As always, we appreciate the support and partnerships we have had that enable our success and the success of our customers!

KEP's 2019 resolution is to prove how we consistently deliver "Service Without Secrets," creating an environment of transparency between KEP and our customers.

At KEP we make the world's best natural rubber latex, TPE and PVC tubing, plus dip-molded products... with no hidden costs. Everything is transparent and traceable, from sourcing and pricing to how we operate.

No surprises – only satisfaction. KEP always delivers service you can see.

FEATURED TEAM MEMBER

As our Kent facility's Order Entry/Billing Specialist, Regina Gordon works hard and strives high to give KEP customers timely, accurate and excellent service. Regina's attention to detail holds the billing and order entry process

to the same high standards we apply to everything we do at KEP. Read more about Regina on our Meet the Team page and [Leader Views Blog](#).

PRODUCT SPOTLIGHT

Aseptic Packaging Solutions

No matter what your product vision is, we have the aseptic packaging solution to fit your needs. Using our experience and engineering ingenuity, we produce a wide array of food-grade tubing, including aseptic fitment hoses. KEP aseptic fitment hoses are used in products that hold a variety of food and beverages at varying viscosities. We offer tubing and assembly services for companies in the pouch and box-in-box business.

Have a packaging idea or intended use in mind for our aseptic fitment hoses and components? [KEP is up for the challenge!](#)
